

Main Street Construction Project

Update on September 19, 2018

On Monday, August 13, 2018, Bruman Construction started construction on Main Street. The project is progressing very close to schedule with a possible one-week delay in the proposed October 15th end date, which permitted the Sunflower Festival to take place ahead of the start of construction.

Early in construction, the crew had encountered an odour which required investigation. The nature and scope of the odour required removal of some of the soil. Remediation at the site is now complete, and did not delay the project.

Vehicular traffic continues to be re-routed however pedestrian access to local businesses has been maintained. Please continue to follow and respect all signage. The contractor has been taking care to maintain a safe worksite especially since the start of school and proximity of children and crossing guards.

Should it be necessary to disrupt municipal services (garbage pick-up, sewer service, etc.) Bruman Construction will provide affected homeowners with 48 hours' notice.

Thank you for your time and patience during this time of construction.
